

GEORGE'S STREET DUN LAOGHAIRE, IRELAND

ARCHITECTURAL APPRAISAL AND DESIGN GUIDANCE

Dun Laoghaire is at the heart of the Dublin Bay area's huge economic expansion, but its historic main shopping street is under threat from competing modern centres, erosion of original architecture, small sized retail units, vehicle movement and parking problems. Dun Laoghaire Rathdown Council commissioned CAP to undertake a comprehensive appraisal and characterisation of the whole street. Meetings were held with local traders and others, who identified particular concerns. Topics studied included strategic issues, the public realm, protected buildings, shopfronts, restoring lost features, enforcement, design of new buildings, negative influences, special projects, development and enhancement opportunities.
